

Position Description

Job Title: Field Data Analyst

Location: Nashville, TN

Reports to: Regenerative Ag Coordinator

Start Date: 1/9/2023

Position Summary:

AgriCapture is a mission-driven company that certifies Climate-Friendly practices on farms, ranchlands and grasslands and quantifies associated emissions reductions, enabling producers to generate revenue for their sustainable management practices. By certifying agricultural products as Climate-Friendly and developing carbon credits, we serve corporations who are reducing and offsetting their GHG emissions while empowering consumers to consciously select Climate-Friendly products. We are seeking a Field Data Analyst to support our expanding projects.

As a Field Data Analyst, you'll play a critical role in expanding AgriCapture's Carbon Offset projects and Climate Friendly Certifications. You will be expected to gain a deep understanding of Carbon Offset projects and the data that is required to ensure their completion. This will be a dynamic, fast-paced position providing a unique opportunity to be a part of a growing company that is poised to have a positive environmental impact.

Objectives of the Role

- Assist in expanding AgriCapture's Carbon Offset projects through data collection and analysis

Responsibilities

- Gather, interpret, and analyze agricultural data to prove sustainable farming practices were implemented
- Develop Excel tools for tracking, monitoring, and quantifying agricultural operations
- Gain an in-depth understanding of developing Carbon Offset Projects and Climate Friendly Commodity certifications

Skills and Qualifications

- Microsoft Excel and SQL (preferred but not required)
- Strong organizational skills to help collect, measure, and analyze data
- Accuracy and attention to detail

Benefits

- Competitive salary commensurate with experience
- Potential for stock options
- Health, 401k, and Paid Time Off Benefits
