Job Title: Regenerative Grazing Specialist / Agronomist
Location: Remote / Nashville, TN

Position Summary:

AgriCapture is a mission-driven company that certifies Climate-Friendly practices on farms, ranchlands, and grasslands and quantifies associated emissions reductions, enabling producers to generate revenue for their sustainable management practices. By certifying agricultural products as Climate-Friendly and developing carbon credits, we serve corporations who are reducing and offsetting their GHG emissions while empowering consumers to consciously select Climate-Friendly products. AgriCapture is an early-stage startup, and the Regenerative Grazing Specialist will play a key role in supporting day-to-day agronomic and grazing data management and enabling AgriCapture to grow its business.

AgriCapture is seeking a highly self-motivated individual to work closely with the team to assist with management of grassland projects. The Regenerative Grazing Specialist must be an organized multitasker able to provide technical leadership in coordination of regenerative grassland and grazing projects. This will be a dynamic, fast-paced position providing a unique opportunity to immediately be a part of a growing company that is poised to have a positive environmental impact.

Responsibilities

- Gather data from ranches and farms throughout the United States and analyze the feasibility of implementing regenerative agriculture practices.
- Identify areas of mismanagement in the operation including: degraded pasture due to over-grazing and recommend improvements.
- Develop best management practices for regenerative grazing operations.
- Develop optimal grass type in pastureland.

Skills and Qualifications

- BS or higher in a technical field such as animal science, agronomy, natural resources management and / or a business degree and relevant industry experience.
- Ability to gather, analyze, and tell a story with data.
- Ability to work with ranchers, farmers, and landowners to develop regenerative processes in their operations.

Preferred Qualifications

- A working knowledge of grassland systems across a wide variety of regions.
- Familiarity with implementing regenerative practices on farms and ranches.
- Experience with data management and collection.
- Experience with livestock rotational grazing, management, and diets.
- Experience with soil analysis.
- Knowledge of livestock feeding regimens.

Benefits

- Competitive salary commensurate with experience

- Potential for stock options
- Generous Health, 401k and Paid Time Off Benefits

AgriCapture is committed to creating a diverse environment and is proud to be an equal-opportunity employer. AgriCapture recruits employs, trains, compensates, and promotes regardless of race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status.
